

## Group Assignment 1A

# Analysis of 3rd-party Data Sharing and Data Tracking and of GDPR Compliance of Norwegian Web Sites

- When a front page loads, how many third parties does it contact, and in which countries do those servers appear to be located?
- When a site processes personal data, has it named a GDPR Article 6 lawful basis, and does the ICO tool agree?

Humna Akhtar · Mithun Chandra Debnath · Karina Sætersdal Nilssen

# Two questions and how we measured

## Part 1 · Webb koll

- 18 sites: cookies, requests, KeyCDN country
- One clean load per site; rank on Table 2 (20 Aug)
- KeyCDN = IP geolocation guess, not legal transfer proof

 Webb koll results for klassekampen.no

## Part 2 · ICO

- Five sites, one purpose per run
- Notice vs ICO Word report (26 Aug 2026)
- Yes if notice and ICO agree
- Partial if consent is INCONCLUSIVE
- Tax, cookies, checkout and marketing are different purposes

# What Webbkoll shows and key findings

## What Webbkoll shows

Cookies, third-party requests and server country.

**Many requests does not mean many cookies.**

 KeyCDN lookup for klassekampen server IP

## Key findings

- fotball.no: 113 requests, zero third-party cookies.
- 17 of 18 sites: zero third-party cookies. ikea.no had 2.
- lanekassen.no (1) and altinn.no (5): quietest e-government pages.
- document.no: widest country list (6 excluding Norway).
- News/media contacted the most. Government the fewest.
- babyshop.no: 101 on Table 3; ranking stays on Table 2 (45).

# Highest and lowest third-party requests

## Highest five

**1 fotball.no**

Sport · 113 requests · 5 countries

**2 worldofwarcraft.com**

News/media · 90 · 4

**3 document.no**

News/media · 51 · 6 (widest list)

**4 aftenposten.no**

News/media · 48 · 5

**5 klassekampen.no**

News/media · 46 · 2

## Lowest five

**1 lanekassen.no**

Government · 1 request

**2 altinn.no**

Government · 5

**3 nrk.no**

News/media · 7

**4 spotify.no**

News/media · 10

**5 skiforeningen.no**

Sport · 14

Ranked on Table 2. lanekassen.no and altinn.no are the quietest e-government fronts. babyshop.no is 101 on Table 3; we do not re-rank.

Part 1 · Figures 2 to 4

# Third-party requests by site and sector

Table 2. News/media is the highest sector. Government is the lowest. Sport is high because of fotball.no.

# ICO: one purpose at a time

- Official ICO Word reports dated 26 August 2026. The labels are guidance, not a court finding.
- One purpose per run. Compare what the notice claims with what ICO marks.
- Yes: notice and ICO line up for that purpose. Partial: the notice aims at consent; ICO marks INCONCLUSIVE.
- Tax, cookies, checkout and marketing are different purposes.

# ICO result versus the notice

| Service         | Purpose             | ICO                            | Match   |
|-----------------|---------------------|--------------------------------|---------|
| skatteetaten.no | Tax / folkeregister | Legal obligation + public task | Yes     |
| skatteetaten.no | Optional cookies    | Consent INCONCLUSIVE           | Partial |
| netflix.no      | Paid streaming      | Contract                       | Yes     |
| fotball.no      | Name + club, 13+    | Legitimate interests           | Yes     |
| document.no     | Google Signals      | Consent INCONCLUSIVE           | Partial |
| babyshop.no     | Checkout            | Contract                       | Yes     |

ICO labels are guidance. Partial: the notice aims at consent; ICO does not mark consent APPROPRIATE.

## Four match, two consent tests Partial

**Four core purposes match the notice: tax, paid streaming, match history, checkout.**

**Two consent tests are Partial: Skatteetaten optional cookies and document.no Google Signals.**

In both cases the notice claims consent, but the ICO marks consent INCONCLUSIVE.

Skatteetaten does not spell out clearly enough who processes the optional cookies and how to refuse them. document.no points users to Google ad settings; the ICO says that is not a clear, separate consent request, and Pluss terms bundle the notice.

## skatteetaten.no: two purposes

- Tax and registry data: the law requires it. Opt-out is generally not possible.
- ICO: legal obligation and public task APPROPRIATE. Consent NOT APPROPRIATE. Match: Yes.
- Optional statistics cookies: the notice claims consent.
- ICO: consent INCONCLUSIVE; no basis APPROPRIATE. Match: Partial.

# netflix.no: paid streaming

- Purpose: account and payment data needed to provide the paid service.
- Notice (EEA/UK): contractual necessity.
- ICO: contract APPROPRIATE. Consent marked likely invalid for this purpose.
- Ads and marketing in the same notice were left out.

# fotball.no: match history

- Purpose: name and club of active players aged 13+, with club opt-out.
- ICO: legitimate interests APPROPRIATE.
- NFF is not a public authority, so public task does not fit.
- FIKS membership is a different purpose and was not this run.

# document.no: Google Signals

**ICO: no basis APPROPRIATE. Consent INCONCLUSIVE. Match: Partial.**

- Purpose: advertising analytics from site activity.
- The notice does not name Article 6. It looks like consent.
- ICO: the request is not clear, prominent and separate from terms.
- The choice sits in Google settings. Pluss terms also bundle the notice.

# babyshop.no: checkout

- Purpose: name, address, contact, order and payment to deliver goods.
- The sales terms are a purchase contract.
- ICO: contract APPROPRIATE. Match: Yes for checkout.
- The notice does not label Article 6(1)(b). Marketing is a separate purpose.

## What the report shows

We measured how much 18 sites contact others on load, and we checked whether five of them have a valid GDPR basis for one specific purpose.

Many sites reach out to many others without setting cookies.

Four of five ICO purposes match the notice.

In two places where the site claims consent, the ICO is not satisfied with how consent is formulated.
