

Group Assignment 1A

Analysis of 3rd-party Data Sharing and Data Tracking and of GDPR Compliance of Norwegian Web Sites

- When you open a front page, who else does it contact - and where in the world are those servers?
- When a site uses personal data, does it have a lawful basis - and does that claim hold up?

Humna Akhtar · Mithun Chandra Debnath · Karina Sætersdal Nilssen

Two questions, two tools

Part 1 · Webb koll

- 18 Norwegian front pages - one clean visit each
- Who do they call? Cookies, requests, server country (first scan, 20 Aug)
- KeyCDN shows where servers sit - a guess, not proof of lawful transfer

 Webb koll results for klassekampen.no

Part 2 · ICO

- Five sites - one purpose per run, because mixed questions break the test
- Does the privacy notice match the ICO report? (26 Aug 2026)
- Yes when notice and ICO tell the same story
- Partial when consent wording fails the checklist
- Tax, cookies, checkout and ads are not the same question

Your browser talks to strangers

What Webbkoll reveals

Every front page starts a conversation - Webbkoll records who joins it.

Many requests does not mean many cookies.

 KeyCDN lookup for klassekampen server IP

Key findings

- fotball.no: 113 hosts, zero third-party cookies - loud, but not cookie-heavy.
- 17 of 18 sites: no third-party cookies on load. ikea.no was the exception (2).
- lanekassen.no (1) and altinn.no (5): the quietest public-sector doors.
- document.no: data paths touch 6 countries, excluding Norway.
- News and media reach out most. Government pages reach out least.
- babyshop.no doubled on repeat scan (45 to 101) - rankings stay on the first scan.

The loud and the quiet

Highest five

1 fotball.no

Sport · 113 requests · 5 countries

2 worldofwarcraft.com

News/media · 90 · 4

3 document.no

News/media · 51 · 6 (widest list)

4 aftenposten.no

News/media · 48 · 5

5 klassekampen.no

News/media · 46 · 2

Lowest five

1 lanekassen.no

Government · 1 request

2 altinn.no

Government · 5

3 nrk.no

News/media · 7

4 spotify.no

News/media · 10

5 skiforeningen.no

Sport · 14

Same question, different answers: fotball.no shouts (113), lanekassen.no barely whispers (1). Rankings follow the first scan.

Where the traffic goes

News and media pull the most strings on load. Government pages keep the fewest.

Does the privacy notice mean what it says?

One purpose per ICO run (26 Aug 2026). We ask: does the site's legal story hold up? Yes when notice and ICO agree. Partial when consent is INCONCLUSIVE.

Service	Purpose	ICO	Match
skatteetaten.no	Tax / folkeregister	Legal obligation + public task	Yes
skatteetaten.no	Optional cookies	Consent INCONCLUSIVE	Partial
netflix.no	Paid streaming	Contract	Yes
fotball.no	Name + club, 13+	Legitimate interests	Yes
document.no	Google Signals	Consent INCONCLUSIVE	Partial
babyshop.no	Checkout	Contract	Yes

ICO guidance is not a court verdict - but it shows where the story breaks.

Four honest answers, two broken promises

Four purposes hold up: tax by law, streaming by contract, match history by interest, checkout by contract.

Two consent claims fail: Skatteetaten optional cookies and document.no Google Signals.

Both notices say consent - but the ICO marks consent INCONCLUSIVE.

Skatteetaten does not say clearly enough who runs the optional cookies or how to refuse. document.no sends you to Google ad settings - not a clear, separate choice - and Pluss terms bundle the notice.

skatteetaten.no: duty and choice

- Tax and registry data: the law requires it. You cannot opt out of being counted.
- ICO: legal obligation and public task APPROPRIATE. Consent NOT APPROPRIATE. Match: Yes.
- Optional statistics cookies: the notice says you can choose - but does it explain how?
- ICO: consent INCONCLUSIVE; no basis APPROPRIATE. Match: Partial.

netflix.no: pay to watch

- Purpose: account and payment data to deliver what you paid for.
- Notice (EEA/UK): contractual necessity - not consent.
- ICO: contract APPROPRIATE. Consent marked likely invalid for this purpose.
- Ads and marketing in the same notice were left out - different purpose, different basis.

fotball.no: a name on the team sheet

- Purpose: name and club of active players aged 13+, with club opt-out.
- ICO: legitimate interests APPROPRIATE - sport transparency, not blanket consent.
- NFF is not a public authority, so public task does not fit.
- FIKS membership is a different purpose and was not this run.

document.no: consent without a real choice

ICO: no basis APPROPRIATE. Consent INCONCLUSIVE. Match: Partial.

- Purpose: advertising analytics built from what you read and click.
- The notice never names Article 6 - but it reads like consent.
- ICO: the request is not clear, prominent and separate from terms.
- The choice lives in Google settings. Pluss terms also bundle the notice.

babyshop.no: pay to receive

- Purpose: name, address, contact, order and payment to deliver goods.
- The sales terms are a purchase contract - you pay, they ship.
- ICO: contract APPROPRIATE. Match: Yes for checkout.
- The notice does not label Article 6(1)(b). Marketing is a separate purpose.

What we learned

Opening a Norwegian front page starts a hidden conversation - we mapped 18 of them.

Many sites reach out widely without setting a single third-party cookie.

Four of five ICO purposes match what the notice claims.

Where sites say consent, the wording must be real - in two cases, the ICO says it is not.

Questions?

Who else does your browser meet - and does the privacy notice tell the truth?
