Group Assignment 1A

Analysis of 3rd-party data sharing and data tracking and of GDPR compliance of Norwegian web sites

Humna Akhtar · Mithun Chandra Debnath
Karina Sætersdal Nilssen · Sumit Prasad Sah

Oslo Metropolitan University
Due 3 September 2026

The report has two parts

Part 1 · Webbkoll

- 18 course-listed sites (Table 1)
- Shopping, government, news/media/entertainment, spare time/sports
- Columns: server country, internal/external cookies, 3rd-party requests, countries excl. Norway
- Figures 2-4: all 18 sites, share, sector totals
- Rank on Table 2 requests, not cookies

Part 2 · ICO lawful basis

- Five notices from Table 1a (one shopping, one government, two news, one sport)
- babyshop, skatteetaten, Netflix, document.no, fotball.no
- One concrete purpose per ICO run
- Compare notice vs official ICO Word report (26 Aug 2026)
- Cookies, membership and checkout stay separate purposes

How we measured with Webbkoll

- English Webbkoll; one live Chromium visit: no add-ons, no Do Not Track
- Server country = KeyCDN of the site IP; country list = KeyCDN of third-party IPs
- Norway dropped from the country count (the list may still print NO)
- n/a = KeyCDN returned no country (dnt.no, babyshop.no, altinn.no on Table 3)
- Table 2 = first scan and ranking base; Table 3 = later check, not averaged
- Request count is not the same as cookie count

What Webbkoll does not do

- It does not decide Article 6. That is the ICO tool.
- A high request count is not a cookie count.
- ikea.no is the only row with external cookies (2), after redirect to ikea.com.
- babyshop.no is 101 requests on Table 3, but 45 on Table 2. Rankings stay on Table 2.
- Article 6 is not on the Webbkoll page. That is the ICO tool.

Highest and lowest third-party requests

Highest five

1 fotball.no

Sport · 113 requests · 5 countries

2 worldofwarcraft.com

News/media · 90 · 4

3 document.no

News/media · 51 · 6 (widest list)

4 aftenposten.no

News/media · 48 · 5

5 klassekampen.no

News/media · 46 · 2

Lowest five

1 lanekassen.no

Government · 1 request

2 altinn.no

Government · 5

3 nrk.no

News/media · 7

4 spotify.no

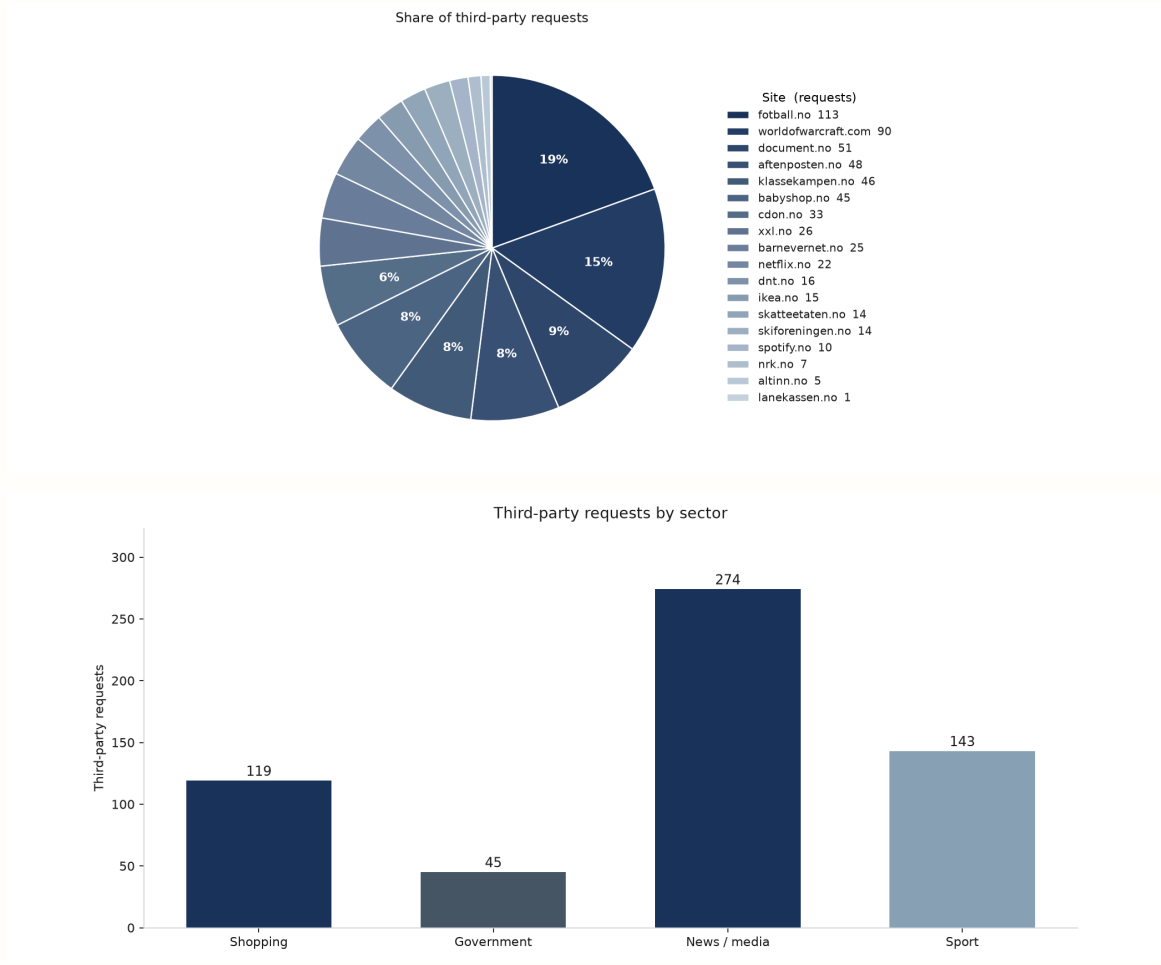

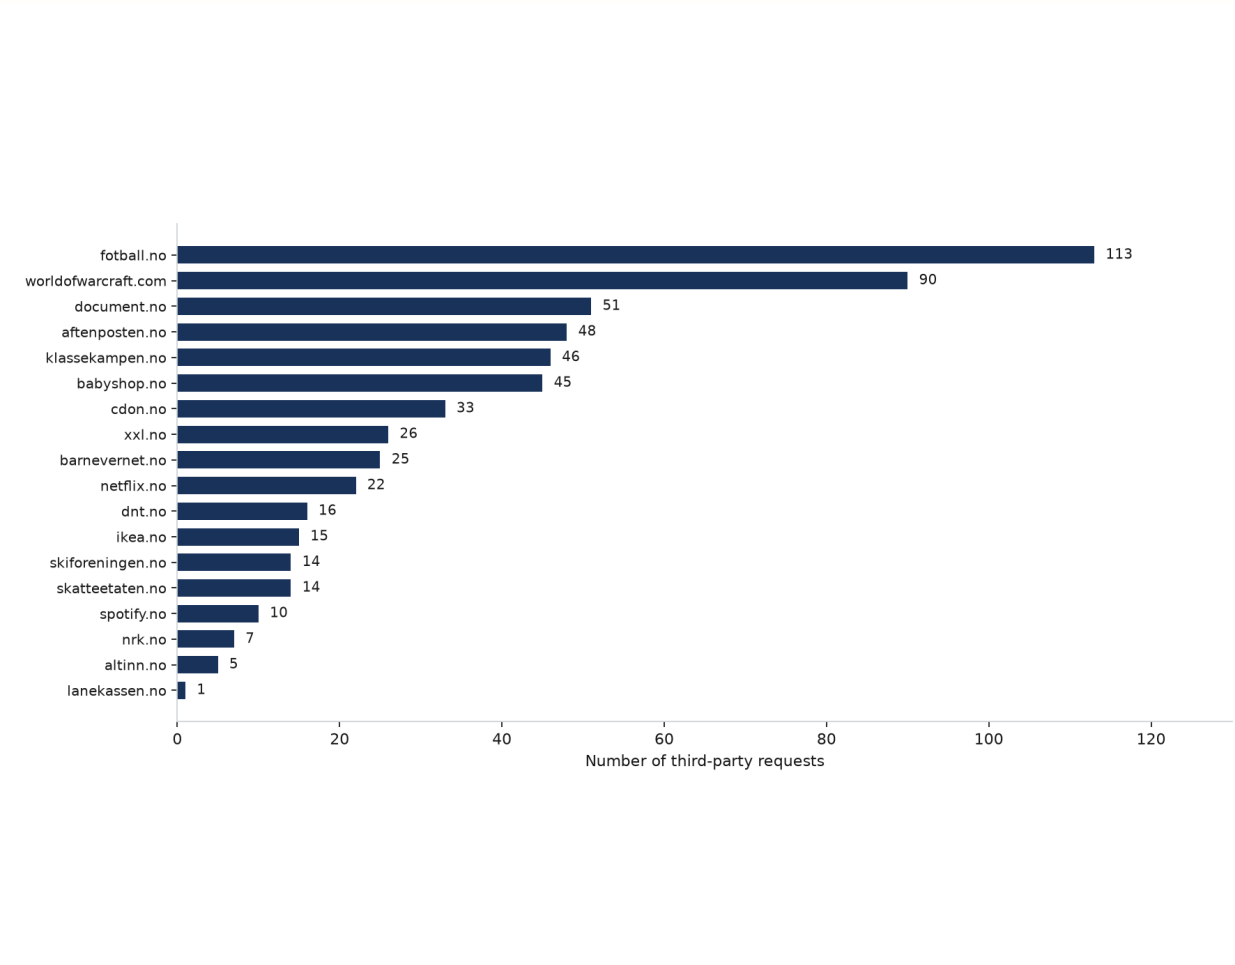

News/media · 10

5 skiforeningen.no

Sport · 14

Table 2 request column. Highest 1 = worst sharer. Lowest 1 = most restrained. babyshop 101 is Table 3 only.

Third-party requests by site and sector

All three charts use Table 2. News/media is the largest sector total; government is the smallest; sport is high because of fotball.no.

klassekampen.no: 46 on the ranking, 56 on the screenshot

Table 2 rank: 46 requests, 0 third-party cookies. Screenshots = later visit (Table 3: 56 requests to 13 hosts). Server KeyCDN: United States, Google.

ICO lawful basis: one purpose at a time

- Tool: ICO Lawful basis interactive guidance. Official Word reports dated 26 August 2026.
- Five services from Table 1a. One concrete processing activity per run.
- Compare: what the notice claims vs what ICO marks APPROPRIATE.
- Match Yes = they line up for that purpose. Partial = notice aims at consent, ICO marks INCONCLUSIVE.
- Do not mix cookies, marketing, membership and checkout in one run.
- UK recognised legitimate interest did not fit any of our five purposes.

One purpose per ICO run

Article 6 (GDPR)

- Why may we process this personal data?
- Contract, legal obligation, public task, consent, legitimate interests
- Example: tax and folkeregister under named acts

Keep purposes apart

- Tax data is not optional statistics cookies
- Checkout is not marketing
- Match lists are not FIKS membership
- Mix them in one ICO run and the tool mixes the bases

ICO result vs the notice

Service	Purpose	ICO	Match
skatteetaten.no	Tax / folkeregister	Legal obligation + public task	Yes
skatteetaten.no	Optional cookies	Consent INCONCLUSIVE; none APPROPRIATE	Partial
netflix.no	Paid streaming	Contract	Yes
fotball.no	Name + club, 13+	Legitimate interests	Yes
document.no	Google Signals	Consent INCONCLUSIVE; none APPROPRIATE	Partial
babyshop.no	Checkout / delivery	Contract	Yes

Each row is one purpose. Yes = notice and ICO line up. Partial = they aim at consent, but ICO marks consent INCONCLUSIVE and no basis APPROPRIATE.

skatteetaten.no: law for tax, consent for cookies

- Purpose 1: identity, income and tax data for tax and folkeregister.
- Notice: first and foremost laid down in law. Opt-out generally not possible.
- Named acts: skatteforvaltningsloven, folkeregisterloven, skattebetalingsloven.
- Controller: the Director General of Taxation (Skattedirektøren).
- ICO: legal obligation APPROPRIATE, public task APPROPRIATE.
- Consent NOT APPROPRIATE for core tax (no genuine free choice). Contract and LI NOT APPROPRIATE.
- Purpose 2: optional stats cookies in the notice. ICO: consent INCONCLUSIVE (Q6). No basis APPROPRIATE.

netflix.no: contract for the paid service

- Purpose: account and payment data to provide the subscription.
- EEA/UK notice: contractual necessity to provide the service to members.
- ICO: Contract APPROPRIATE. All other bases NOT APPROPRIATE.
- Consent: not appropriate / likely invalid (no real ongoing choice).
- LI, legal obligation and consent in the notice apply to other purposes.
- Keep ads, recommendations and marketing out of this run.

fotball.no: legitimate interests for match history

- Purpose: publish name and club of active players 13+ (kamphistorikk).
- Notice: public-interest match history, opt-out via the club.
- ICO: Legitimate interests APPROPRIATE after necessity + balancing.
- NFF is a sports federation, not a public authority (public task No).
- FIKS membership can use contract. That is a different purpose and was not this run.
- This ICO run is match-history publication only.

document.no: Google Signals

ICO marks no basis APPROPRIATE. Consent is INCONCLUSIVE.

- Purpose: Google Signals / ad analytics (demographics, interests, cross-device).
- Notice does not name Article 6. Runs only if logged into Google with ad personalization.
- Opt-out: Google Ads Settings, mobile, NAI, Analytics add-on.
- Q5: consent request is not clear, prominent and separate from terms.
- Choice sits at Google. Pluss terms also say you accept the privacy notice by using the service.
- Contract and LI correctly rejected for this advertising purpose.
- Match: partial. They aim at consent; ICO says fix the request.

babyshop.no: contract for checkout

- Purpose: name, address, contact, order and payment to deliver goods.
- Terms point 1: a sales contract (18 years or guardian).
- ICO: Contract APPROPRIATE. Other bases NOT APPROPRIATE.
- Notice does not label Art. 6(1)(b). Section 5 is profiling, not purchase.
- Marketing/profiling: consent (separate). Cookie policy: necessary vs measurement vs marketing.
- Bundled consent to cookies inside the terms is not valid Art. 6 consent.

What we want the room to remember

- Webbkoll measures contact, not lawfulness.
- Rankings follow Table 2. Table 3 is a check. Do not average them.
- fotball.no has the highest request count (113) and still zero third-party cookies.
- Four of five core ICO purposes match the notice (Table 5).
- Two consent tests fail: skatteetaten cookies (Q6) and document.no Signals (Q5).
- Legal obligation (tax) is not the same ICO purpose as optional cookies.
