

ACIT4280 Privacy by Design

Group Assignment 1A

Analysis of 3rd-party data sharing and data tracking and of GDPR compliance of Norwegian web sites

Humna Akhtar · Mithun Chandra Debnath
Karina Sætersdal Nilssen · Sumit Prasad Sah

The report has two parts

Part 1 · Webbkoll

- 18 Norwegian-facing sites
- Shopping, government, news/media, sport
- Server location, cookies, 3rd-party requests, countries excl. Norway
- Graphics per sector
- Highest and lowest contact; most countries; restrained e-government

Part 2 · ICO lawful basis

- Five privacy notices
- skatteetaten, Netflix, fotball.no, document.no, babyshop.no
- One concrete purpose per ICO run
- Compare notice vs official ICO report
- Cookies, membership and checkout stay separate purposes

How we measured with Webbkoll

- English Webbkoll interface
- One live Chromium visit: no add-ons, no Do Not Track, no consent click
- Scan clock on the result page is part of the measurement
- Server country: KeyCDN Country field for the IP
- Norway dropped from the shared-country list
- If KeyCDN returns no country: recorded as not available
- Two tables: Table 2 first measurement, Table 3 repeat measurement

What Webbkoll does not do

- It does not click Yes/No or Cookiebot.
- Zero third-party cookies can still mean many third-party requests.
- ikea.no is the only row with external cookies (2), after redirect to ikea.com.
- The two measurements are not averaged. A later visit can differ (24-hour store).
- Article 6 is not on the Webbkoll page. That is the ICO tool.

Highest and lowest third-party requests

Highest five

1 fotball.no

Sport · 113 requests · 5 countries

2 worldofwarcraft.com

News/media · 90 · 4

3 document.no

News/media · 51 · 6 (widest list)

4 aftenposten.no

News/media · 48 · 5

5 klassekampen.no

News/media · 46 · 2

Lowest five

1 lanekassen.no

Government · 1 request

2 altinn.no

Government · 5

3 nrk.no

News/media · 7

4 spotify.no

News/media · 10

5 skiforeningen.no

Sport · 14

ICO lawful basis: one purpose at a time

- Tool: ICO Lawful basis interactive guidance (updated 14 April 2026).
- Five services, one concrete processing activity per run.
- Find the privacy notice, run the tool, save the official Word report.
- Compare: what the notice claims vs what ICO marks APPROPRIATE.
- Do not mix cookies, marketing, membership and checkout in one run.
- UK tool also has recognised legitimate interest (five narrow public purposes). None of our five purposes fitted that list.

Article 6 is not a cookie click

Article 6 (GDPR)

- Why may we process this personal data?
- Contract, legal obligation, public task, consent, legitimate interests, vital interests
- Example: tax and folkeregister under named acts

ePrivacy / cookies

- May we store/read info on the device?
- Necessary cookies: often no extra consent
- Analytics and ads: consent (Yes/No, Cookiebot)
- No test 24 Aug 2026 on skatteetaten.no/person/

ICO result vs the notice

Service	Purpose	ICO	Match
skatteetaten.no	Tax / folkeregister	Legal obligation + public task	Yes
skatteetaten.no	Optional cookies	Consent INCONCLUSIVE; none APPROPRIATE	Partial
netflix.no	Paid streaming	Contract	Yes
fotball.no	Name + club, 13+	Legitimate interests	Yes
document.no	Google Signals	Consent INCONCLUSIVE; none APPROPRIATE	Partial
babyshop.no	Checkout / delivery	Contract	Yes

skatteetaten.no: law for tax, consent for cookies

- Purpose 1: identity, income and tax data for tax and folkeregister.
- Notice: first and foremost laid down in law. Opt-out generally not possible.
- Named acts: skatteforvaltningsloven, folkeregisterloven, skattebetalingsloven.
- Controller: the Director General of Taxation (Skattedirektøren).
- ICO: legal obligation APPROPRIATE, public task APPROPRIATE.
- Consent NOT APPROPRIATE for core tax (no genuine free choice). Contract and LI NOT APPROPRIATE.
- Purpose 2: optional stats cookies (Skyra, Matomo, GA, Siteimprove). Yes/No. ICO: consent INCONCLUSIVE (Q6). No basis APPROPRIATE.

netflix.no: contract for the paid service

- Purpose: account and payment data to provide the subscription.
- EEA/UK notice: contractual necessity to provide the service to members.
- ICO: Contract APPROPRIATE. All other bases NOT APPROPRIATE.
- Consent: not appropriate / likely invalid (no real ongoing choice).
- LI, legal obligation and consent in the notice apply to other purposes.
- Keep ads, recommendations and marketing out of this run.

fotball.no: legitimate interests for match history

- Purpose: publish name and club of active players 13+ (kamphistorikk).
- Notice: public-interest match history, opt-out via the club.
- ICO: Legitimate interests APPROPRIATE after necessity + balancing.
- NFF is a sports federation, not a public authority (public task No).
- FIKS membership can use contract. That is a different purpose.
- Stamdata samtykke om publisering does not match ICO consent (likely invalid).
- Cookiebot (Deny on 26 Aug 2026) is also a different purpose.

document.no: Google Signals

ICO marks no basis APPROPRIATE. Consent is INCONCLUSIVE.

- Purpose: Google Signals / ad analytics (demographics, interests, cross-device).
- Notice does not name Article 6. Runs only if logged into Google with ad personalization.
- Opt-out: Google Ads Settings, mobile, NAI, Analytics add-on.
- Q5: consent request is not clear, prominent and separate from terms.
- Choice sits at Google. Pluss terms also say you accept the privacy notice by using the service.
- Contract and LI correctly rejected for this advertising purpose.
- Match: partial. They aim at consent; ICO says fix the request.

babyshop.no: contract for checkout

- Purpose: name, address, contact, order and payment to deliver goods.
- Terms point 1: a sales contract (18 years or guardian).
- ICO: Contract APPROPRIATE. Other bases NOT APPROPRIATE.
- Notice does not label Art. 6(1)(b). Section 5 is profiling, not purchase.
- Marketing/profiling: consent (separate). Cookie policy: necessary vs measurement vs marketing.
- Bundled consent to cookies inside the terms is not valid Art. 6 consent.

What we want the room to remember

- Webbkoll measures contact, not lawfulness.
- One purpose per ICO run, or the tool mixes bases.
- fotball.no has the highest request count and still zero third-party cookies.
- Four of five core ICO purposes match the notice.
- Two consent tests fail: skatteetaten cookies (Q6) and document.no Signals (Q5).
- Legal obligation (tax) is not the same as cookie consent (Yes/No).
